## 1) BACKGROUND OF JOM KASI TRAVEL SYSTEM

Our Jom Kasi Travel System is about travelling. There are five main modules which is travel agent, tour guide, cruise consultant, travel writer/blogger and event coordinator. Each module has its own roles to be function. Before access to our system, user needs to sign up first. After sign up with the particulars, when user click the button sign up button, the sign up page will be redirected to our main interface which have five main modules. From there, user can have access to the modules they prefer.

## REPORT (TOUR GUIDE)

### 1. BACKGROUND

Tour Guide Service Information is an information platform for users to seek up-to-date information on what services have been offered. The purpose of this project is to make an interactive GUI (Graphical User Interface) for user's experience of various of features in this program. Other than that, this project also ensures to implement the Object Oriented Programming in this features of program. In this module, parent class which is Tour Guide main is the main application where few option will be providing to users. Next, other module consist of a number of choices have been made for users to select services such as culture tour, city tour, adventure tour and forest tour. Users can also make a booking directly with this program and all data will be stored for further use.

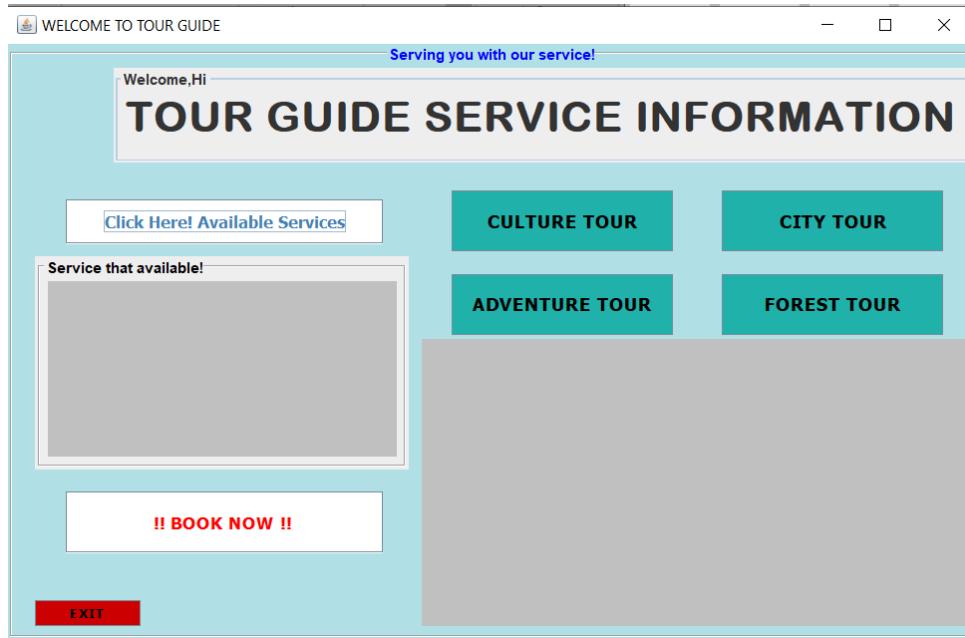

### 2. UML DIAGRAM

### 3. PROGRAM DISCRIPTION

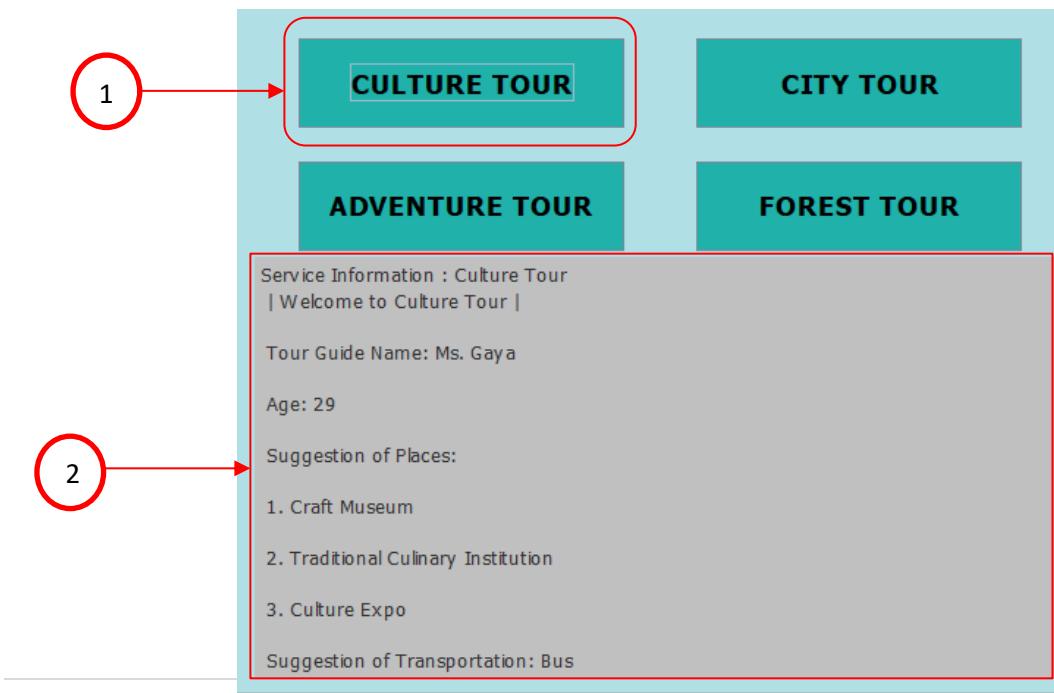

User Manual (Tour Guide Service Information)

#### 1. Home Interface

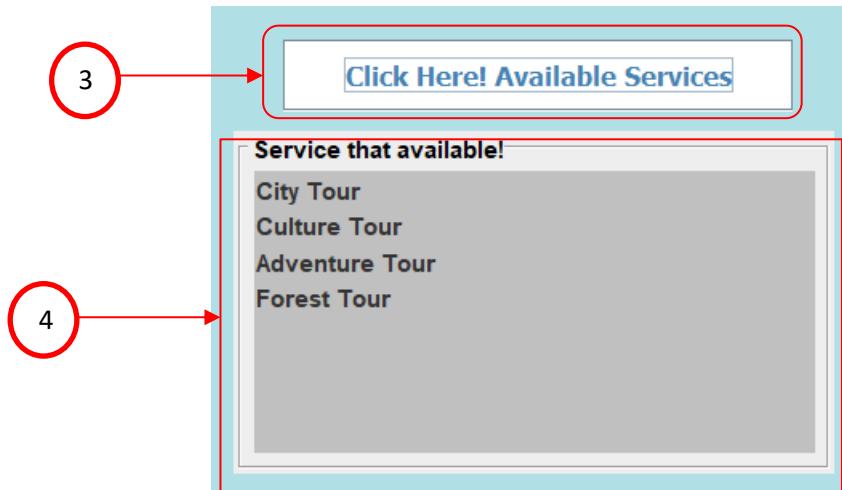

##### 1.1 Information Buttons

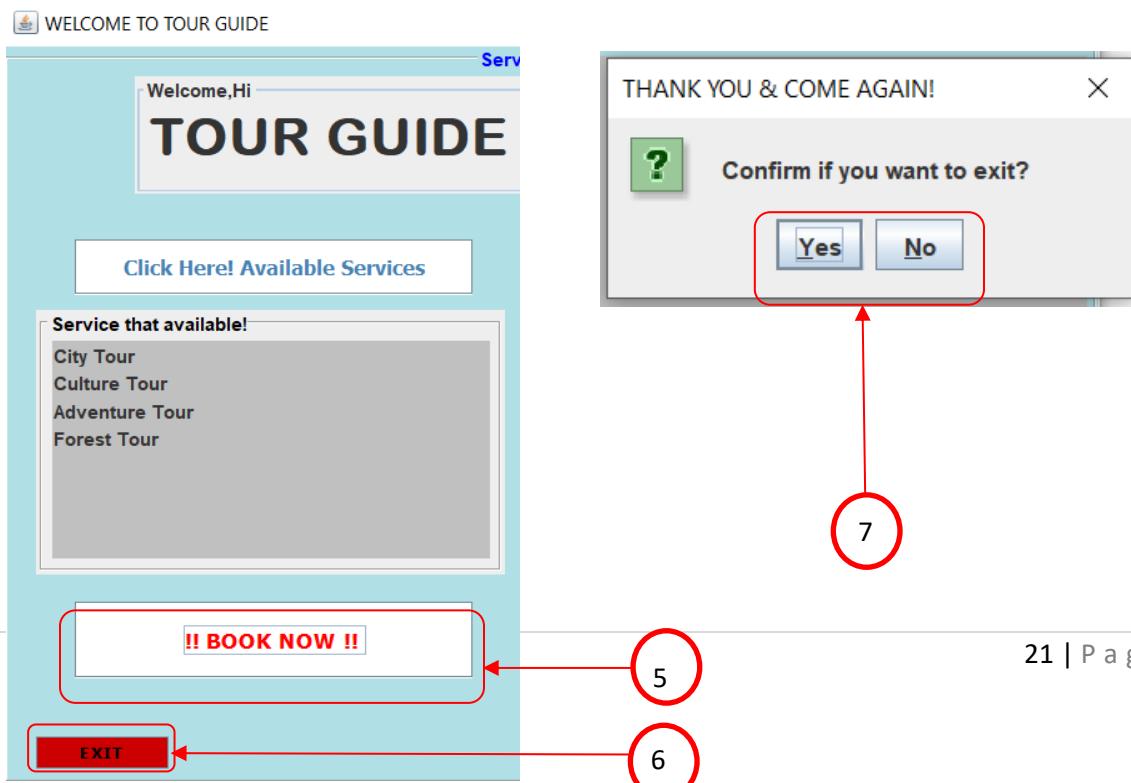

1. Type of button; this button will show more details about the services.
2. Text Panel; this part where user can see the details.

3. Available Service Button; this button shows user the current available services that provided.
4. Text Panel; this text panel with shows latest services that available

5. Booking Button; this button will pop-up a new window to user if they want to make a booking.
6. Exit Button; this exit button will exit this current program
7. Exit Option; user will be give option to stay in current program or exit the program

## 2. Customer Booking System

The screenshot shows a Windows application titled "CUSTOMER BOOKING SYSTEM(TOUR GUIDE)". The main title bar has a logo icon, the title, and standard window control buttons. Below the title bar, there is a toolbar with five buttons: "IMPORT" (light blue), "EXPORT" (light blue), "EXIT" (red), "ADD" (light blue), "RESET" (light blue), "DELETE" (light blue), and "PRINT" (light blue). The main area is divided into two sections. On the left, there is a form with fields for "REF. NO.", "NAME:", "AGE:", "NO. OF PAX:" (with a dropdown menu showing "PLEASE SELECT"), "TYPE OF SERVICE:" (with a dropdown menu showing "PLEASE SELECT"), and "TELEPHONE NO.". On the right, there is a table with columns labeled "REF. ...", "NAME", "AGE", "TELEPHON...", "NO. OF PAX", and "SERVICES". The table currently contains no data.

### 2.1 Booking Flows

1. Reference No.; reference number for person-in-charges to refer the data easily.
2. Name; user need to input name.
3. Age; user need to input age.
4. Drop box No. of Passenger/Guest; user need to choose the selection in the drop box given.
5. Drop box Type of service; Users need to choose the service they want to choose from.
6. Telephone No.; user input telephone no. to be contact after done making booking.
7. Various of buttons option:
  - a. Add; will add the input user key-in and choose.
  - b. Reset; reset the user input.
  - c. Delete; delete the data that user input after added in the table.
  - d. Print; to print the table data.
  - e. Import; function to import existing data from designated document.

- f. Export; function to export the current data to designated document to be stored.
- g. Exit; this exit button will exit this current program

REF. NO	NAME	AGE	TELEPHON...	NO. OF PAX	SERVICES
RE001	Daniel Firda...	23	0122952220	3	CITY TOUR
RE002	Laila	22	0172589630	Min 2pax	CULTURE T...
RE003	Amin	40	0172587410	4	FOREST T...
RE004	Kirtnina	34	0172587415	Max 10pax	ADVENTUR...

 Red numbered circles with arrows point to specific elements: 1 points to the REF. NO field; 3 points to the AGE field; 4 points to the NO. OF PAX dropdown; 5 points to the TYPE OF SERVICE dropdown; 6 points to the TELEPHONE NO field; 7 points to the EXIT button; 8 points to the table area."/>

1. REF. NO RE004

3. AGE: 34

4. NO. OF PAX: Min 2pax

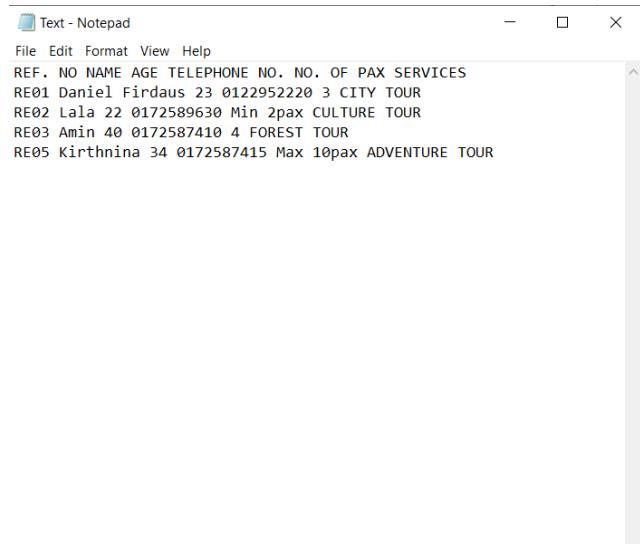

5. TYPE OF SERVICE: ADVENTURE TOUR

6. TELEPHONE NO. 0172587415

7. EXIT

8. Table; all data that user input will be shown in table form.

9. Text file; all the data from the table will export to text file then can be import back to table with the existing data.

## 5. SAMPLE RUN

### a. Home Interface

### b. Register/Booking Interface

The screenshot shows the 'CUSTOMER BOOKING SYSTEM(TOUR GUIDE)' window. At the top right are buttons for 'IMPORT', 'EXPORT', and 'EXIT'. Below them are buttons for 'ADD', 'RESET', 'DELETE', and 'PRINT'. The main area has a table header with columns: REF. ..., NAME, AGE, TELEPHON..., NO. OF PAX, SERVICES. To the left, there's a form with fields for REF. NO., NAME, AGE, NO. OF PAX (with a dropdown menu showing 'PLEASE SELECT'), TYPE OF SERVICE (with a dropdown menu showing 'PLEASE SELECT'), and TELEPHONE NO. (with a text input field).

# REPORT (TRAVEL AGENT)

## 1. BACKGROUND

Travel Agent Information is a platform for user to read details about the information easily and key in their information easily using a friendly GUI (Graphical User Interface). Some of traveller or tourist want to travel but doesn't know what promotion is happening within their budget. Not only that, it's also hard to search for the place's information. Tracking the booking information is also difficult. With this GUI, user will know the latest package promotion expenses and know what to prepare to travel in that places. Not only that, know their final result booking information. For the main interface, user can see the details promotion package and what is not available. For the booking registration system, customer can key in their details and add their record to the data table. Besides that, company also can see the data that the customer registered in their file path.

## 2. UML DIAGRAM

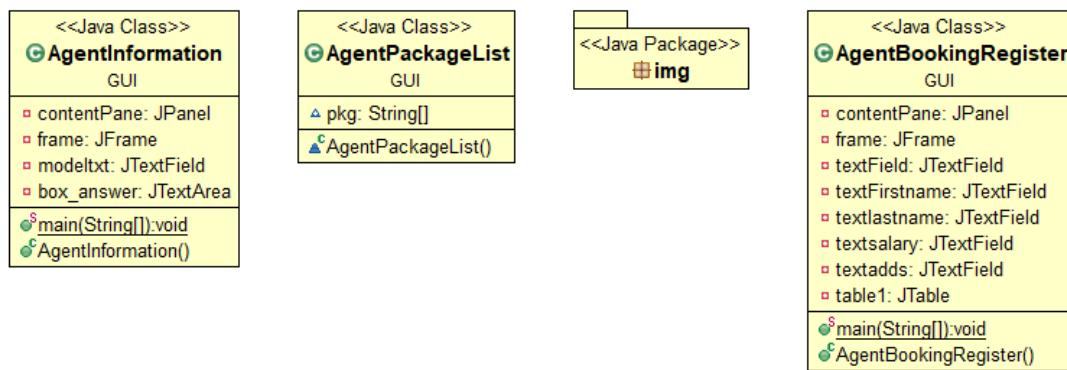

Figure above show the UML Diagram for this project

### **3. PROGRAM DISCRIPTION**

User Manual (Travel Agent Information)

#### 1. Home Interface

## Information Buttons

1. Place type of button: Clicking the places or country button will show the details information about that particular places.
2. Text Area Panel: this part is where user can see the detail information

1

2

You have Choosen: Japan Package

JAPAN PROMOTION PACKAGE:

Awesome place to visit

Weather temperature is around 6 to 18°C.

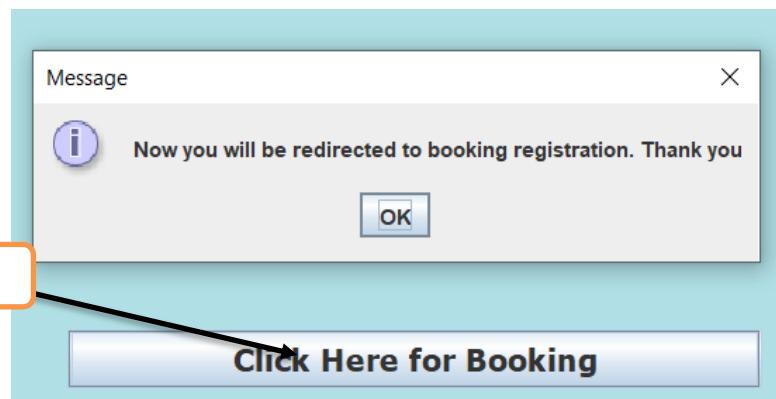

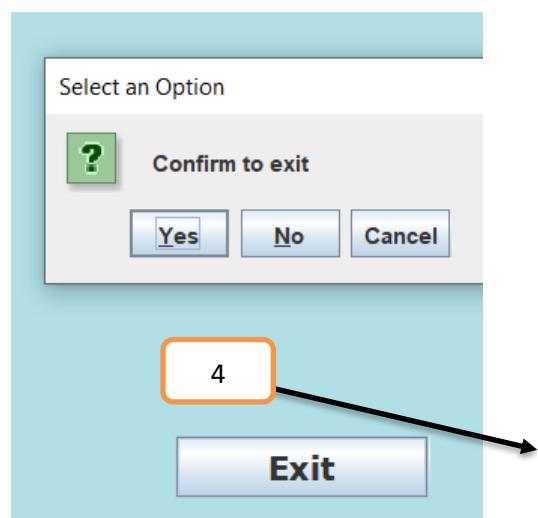

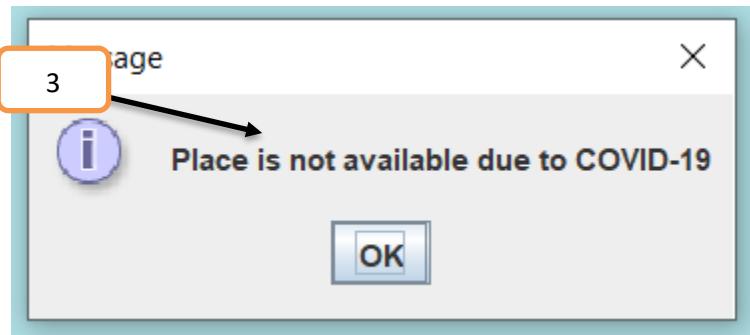

The Season is cherry blossom season

A warm coat and a scarf are still a must when venturing outside

Booking date is Available on March to June

Price is RM4500/pax

3. If places are not available. It will notify user a friendly message that the place is unavailable.
4. Exit button is for user who want to exit the interface. Click Yes to Exit and click No to stay on this page.
5. Click Here for Booking button is for user who want to continue to booking system registration

## 6. Travel Agent Customer Booking System

The screenshot shows a Windows application window titled "Travel Agent Booking System". The interface is divided into several sections:

- Input Fields:** On the left, there are five text input fields labeled "Reference no", "Firstname", "Lastname", "Address", and "Date Package". Below these is a dropdown menu labeled "Choosen package" with the option "PackageAvailable".
- Data Preview:** In the center-right, there is a preview area containing a table with columns: Reference no, Fristname, Lastname, Address, Date Package, and Choosen Package. The preview area is currently empty.
- Buttons:** At the bottom, there are five buttons: "Add Record", "Reset", "Save Data", "Delete", and "Exit".
- Navigation:** A "Back to Travel Info" button is located on the left side of the input field section.

Figure above shows the interface of Travel Agent Customer Booking System

1. Reference No: reference number for person-in-charges to refer the data easily.
2. FirstName: user need to input first name.
3. LastName: user need to input last name.
4. Address: user need to input home address
5. Date Package: Users need to input when the prefer date to book
6. Chosen Package: user need to choose what package they want to pick.

7. Data table area: The area which shows the user input in a table.

Various of buttons option:

- a. Add Record: It will add the input user key-in and into the data table.
- b. Reset: It will reset the user input.
- c. Save data: The program will save data in the data table to a text file.
- d. Delete: Click the data row that you want to delete in the table then click the delete button. It will delete the row of data that user input after it is added in the table.
- e. Exit: Exit button is for user who want to exit the interface
- f. Back to Travel Info: User can go back to the interface which is Travel Agent Information

```

```
    AgentPackageList() {
```

```
        this.pkg = new String [] {"PackageAvailable",  
                                "Japan",  
                                "California",  
                                "Brazil",  
                                "South Korea"
```

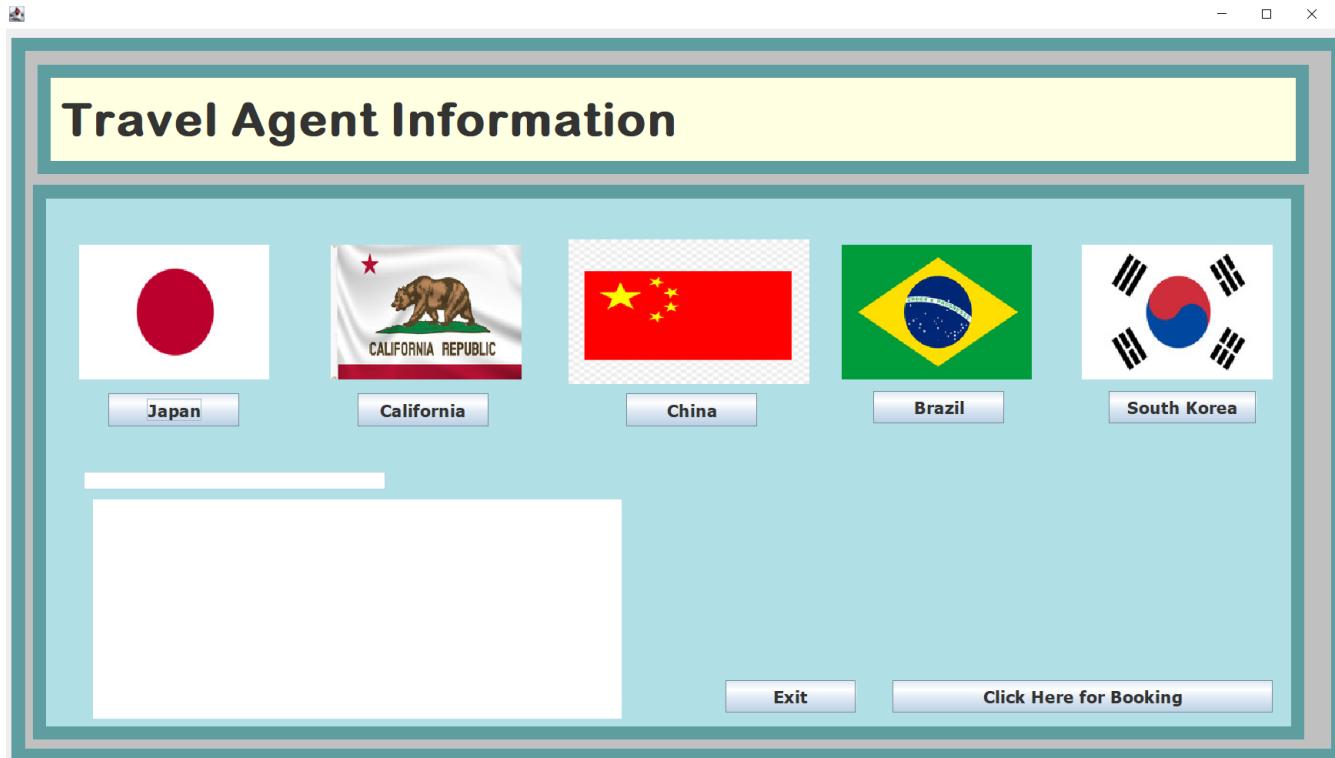

```
    };
```

```
}
```

```
}
```

## 5. SAMPLE RUN

### a) Home Interface

### b) Register Booking Interface

The screenshot shows a Windows application window titled "Travel Agent Booking System". On the left, there is a form with fields for Reference no, Firstname, Lastname, Address, Date Package, and Choosen package (with a dropdown menu showing "PackageAvailable"). To the right is a table with columns: Reference no, Firstname, Lastname, Address, Date Package, and Choosen Package. At the bottom are five buttons: "Back to Travel Info", "Add Record", "Reset", "Save Data", "Delete", and "Exit".

## **REPORT (CRUISE CONSULTANT)**

### **3. CRUISE CONSULTANT**

#### **i. Background of the project**

Traveling is an extraordinary experience every person needs to try. It reveals a whole new and exciting world out there, opens out your inner strength, and presents with unforgettable adventures. This system is mainly for those who interested to get experience on cruise because this system is all about cruise where the user will get to know about cruises much in detail by the cruise assistance assists.

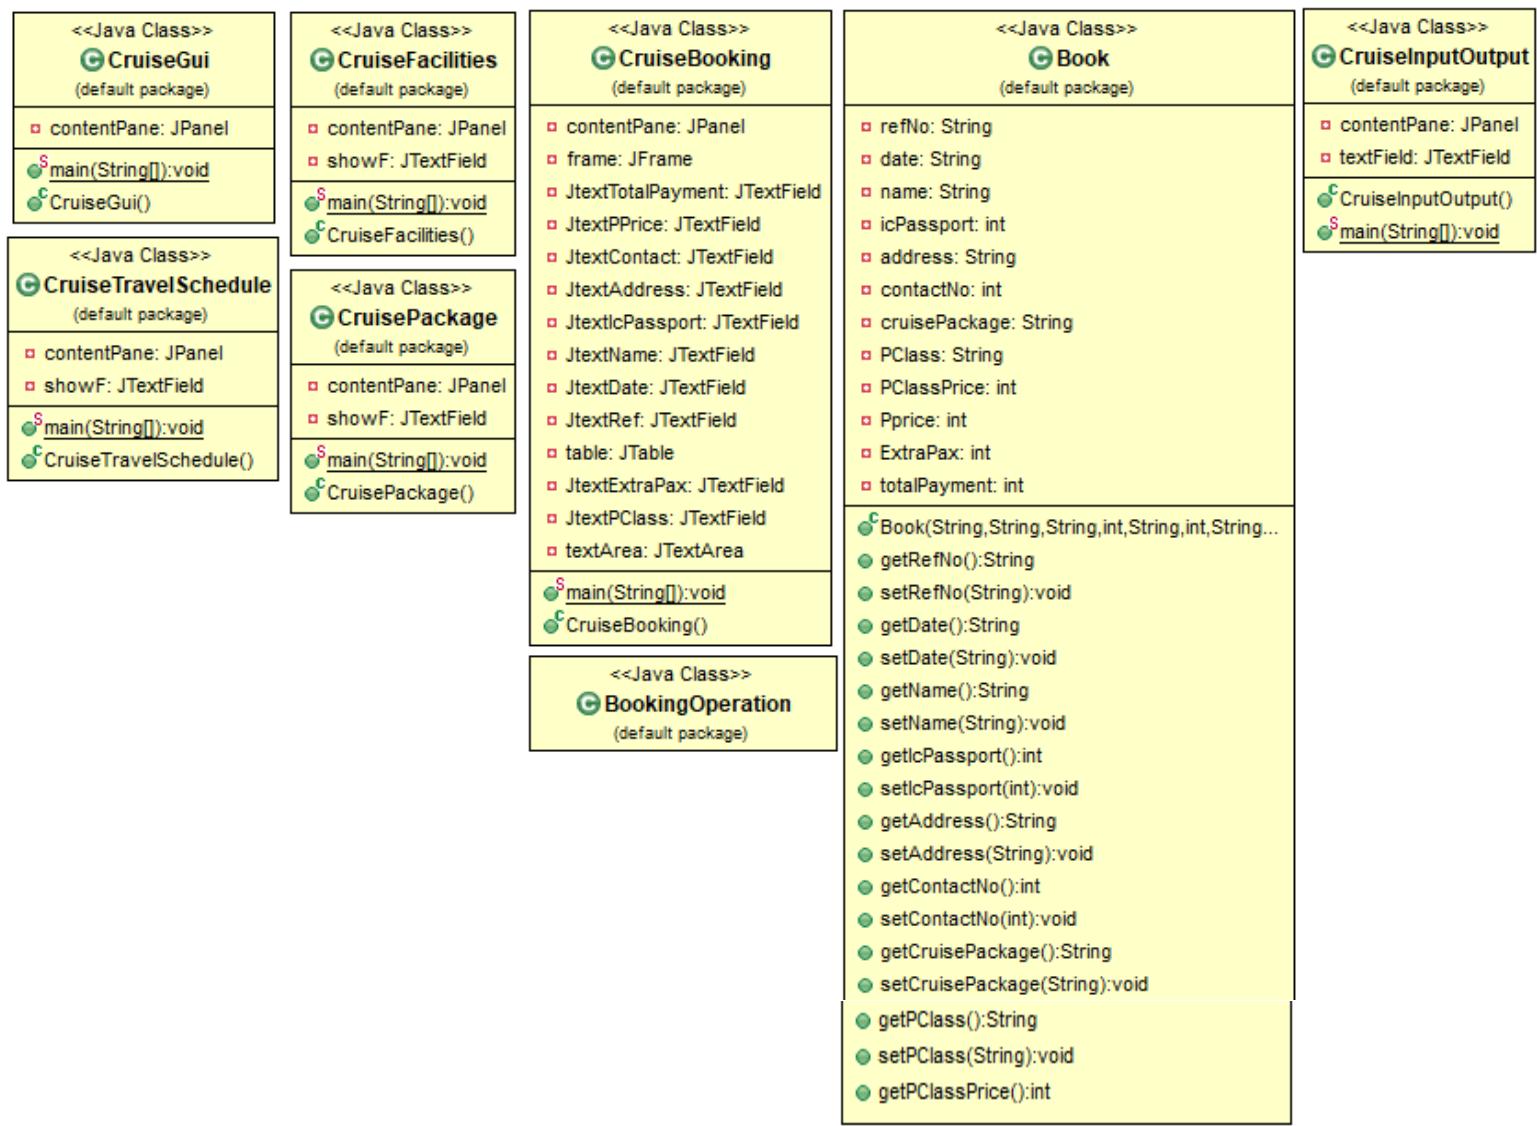

Some of the fascinating aspect of this system is it is very user friendly where the user easily get information about cruise and faster way to deal with booking Every data that user key in will be store with integrity and confidentiality.

This whole cruise consultant system has five modules, such as, travel schedule, cruise facilities, cruise package, booking and inquiries. In the travel schedule module, user will get to know cruise travel schedule by class. There are three classes which is first class, second class and third class. Each class has one respective cruise in operation.

Next is cruise facilities module. In this module, each facility will be shown by main 3 cruises in operation. The facilities description includes interior, exterior, and amenities of the each cruise. After that, cruise package module. In here, user will get to know what are the packages is being provided by our travel system. There are three packages, A. B and C respectively. Each package has its own different descriptions which divided as couple ticket, family ticket and single ticket as respectively.

Now, cruise booking. Here, user will need to key in their information regarding cruise booking. There will be five buttons such as display, reset, delete, add record, print and exit to assists the user in key in information. After done the booking system, there will button provided to go inquiry section as well. In this inquiry section user can key in their inquiry regarding the module cruise consultant. In a nutshell, this cruise consultant system is very useful, informative and easy to handle.

## ii. Unified Modeling Language Diagram

### iii. Program Descriptions

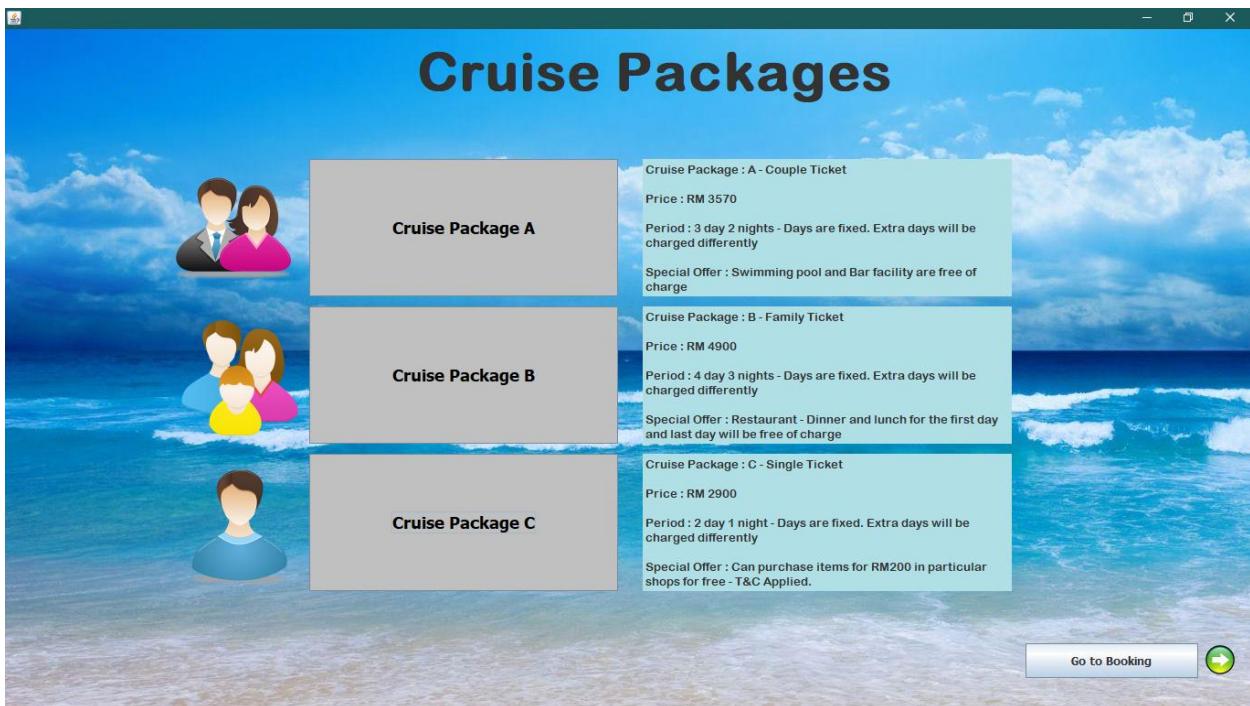

- 1) This is the main interface of cruise consultant system. There are five buttons for each sub module under cruise consultant.
- 2) User need to click each button to go to the page respectively for more information on that particular sub module.

- 1) This is the travel schedule interface where the travel schedule display by class.
- 2) Three classes – First Class, Second Class & Third Class.
- 3) User need to click Go to Cruise Facilities Button so it will redirected to the Cruise Facilities Page.
- 4) When the user clicked the button it will prompt a friendly message that the page is redirecting so click Ok.

- 1) There are three buttons with name of the cruise – Premium Cruise, Golden Star Cruise, and Silver Cruise. Click each button to see its facilities and its description.
- 2) User need to click Go to Cruise Packages Button so it will redirected to the Cruise Packages Page.
- 3) When the user clicked the button it will prompt a friendly message that the page is redirecting so click Ok.

- 1) This is the Cruise Packages Interface. Three Packages Button are there which is A, B and C.
- 2) User need to click on the Packages Button to see the detail briefly.
- 3) User need to click Go to Booking Button so it will redirected to the Cruise Booking System Page.
- 4) When the user clicked the button it will prompt a friendly message that the page is redirecting so click Ok.

The screenshot shows a Windows application window titled "Cruise Booking System". On the left, there is a form with various input fields and dropdown menus. On the right, there is a table displaying data.

**Form Fields:**

- Ref No: 001
- Date: 23/01/2021
- Name: GEEVITHA BATUMALAI
- IC / Passport No: IC
- Address: TMN MAHARANI
- Contact No: 0140000000
- Cruise Package: Cruise Package A
- Preferable Class: Third Class
- Package Price (RM): 2900
- Extra pax: 2
- Total Payment (RM): 3300

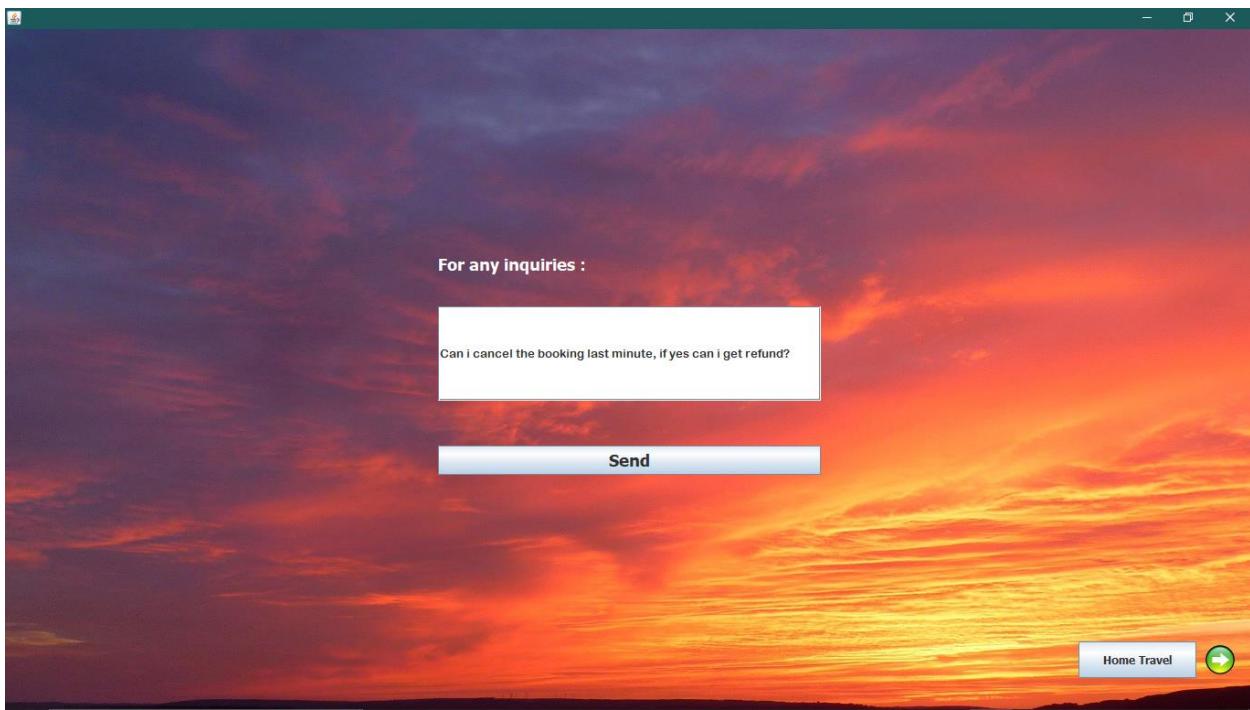

**Table Data:**

Ref No	Date	Name	IC/Passport No	Address	Contact No	Package	Class	C.Price	P.Price	E.Pax	T.Pay(RM)
001	23/01/2021	GEEVITHA BATUMALAI	98102808000	TMN MAHARANI	0140000000	Cruise Pac...	Third Class	200	2900	2	3300

**Buttons:**

- Display
- Reset
- Delete
- Add Record
- Print
- Exit

- 1) This is the Cruise Booking System Interface.
- 2) User need to key in the information on the text field given. And select one of the option in combo box given.
- 3) After key in the information, click the calculate button to see the total payment. The amount will be automatically display in the text field.
- 4) Click on the Display Button to display the information in the table.
- 5) Click Reset Button to reset the previous information to create new information.
- 6) Select any row in the table that user wish to delete, and click Delete Button. The row will be deleted.
- 7) Click Add Record Button to save the data by the system.
- 8) Click Print Button to print out the information.
- 9) Click Exit Button to go to next page, which is Inquiry, it will prompt a friendly message that the page is redirecting so click Ok.

- 1) This is the Inquiry Interface.
- 2) User need to key in the inquiries and click Send. So the data will be send and saved by the system.
- 3) User need to click Home Travel Button so it will redirected to the Home Travel Page.
- 4) When the user clicked the button it will prompt a friendly message that the page is redirecting so click Ok.

## REPORT (TRAVEL WRITER/BLOGGER)

### 1. BACKGROUND PROJECT

Travel Writer/Blogger System is an information platform for traveller or the user himself to find out more about information on places that many people visited or interesting continents. The aims I'm making this project is to make an interesting graphical user interface (GUI) for the traveller and user himself experiences of various features of this java program. Next, this project also is to ensure to implement object oriented (OOP) programming in this java program. There are many options have been made for users to select on this program such as to know about details of continents, which contains the top destinations, popular islands, the room available, traditional food and the mostly transportation use. Users can also make a booking directly from this program.

### 2. UML DIAGRAM

### **3. PROGRAM DESCRIPTION**

User Manual (Traveller System)

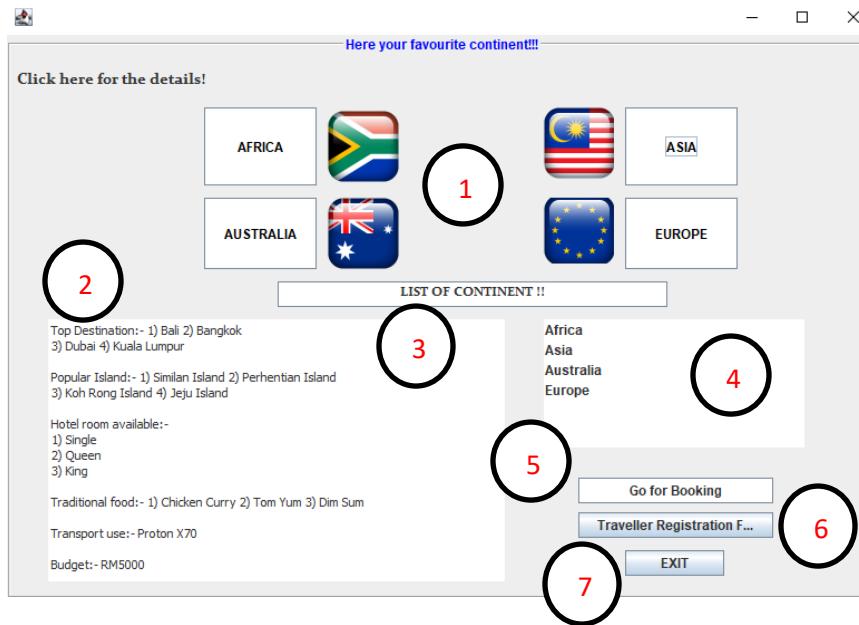

#### **1. Home / interface page**

##### **1.1 Information of buttons**

1. Details of All Continents – this button will let user know more information about the continents that user choose
2. Traveller Registration System – this button is for the user input the information required in form
3. Inquiries – if user have any comment about this program, user can click on this button

## 2. Information of continents page

### 2.1 Information of buttons

1. Type of buttons – this button will show more details about the continents that user choose
2. Text panel – this part is all information will display at here to let user know more about continents
3. List of continents – click on this button to see available continents
4. Text panel – the list of continents will be display at
5. Go for booking – button to let user booking to travel
6. Traveller registration form – will let user go to the next page which user need to complete the form
7. Exit – button for exit this page

### 3. Traveller registration system/form page

The screenshot shows a Windows application window titled "TRAVELLER REGISTRATION SYSTEM". The main area contains a form with the following fields and their values:

Reference No	0001
Firstname	ahmad
IC/Passport	faris
Address	kampung
Post Code	31600
Telephone No	017
Date Registered	24/1/2021
Chosen Continent	Asia
Total Traveller	3
Budget (RM)	5000

To the right of the form is a smaller table showing the current data entry:

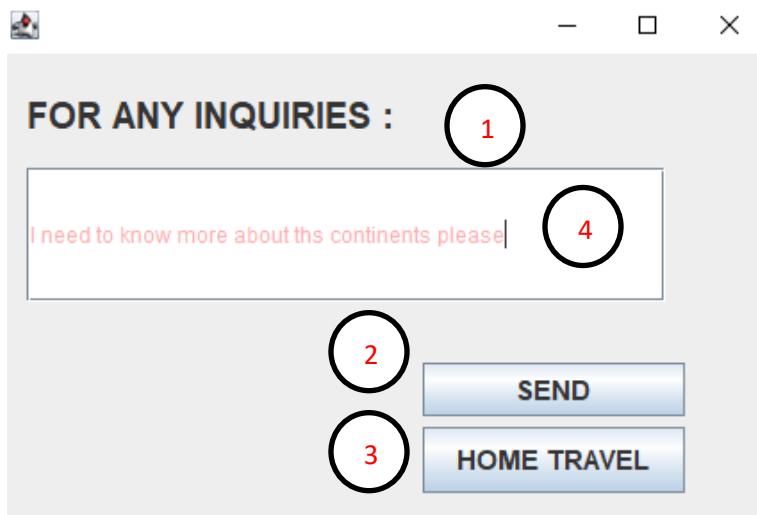

Reference ...	Firstname	IC/Passport	Address	Post Code	Telephon...	Date Reg	Choosen ...	Total Trav...	Amount P...
0001	ahmad	faris	kampung	31600	017	24/1/2021	Asia	3	5000

At the bottom of the window are several buttons: Add Record, Reset, Print, Delete, Exit, and Inquiries.

#### 3.1 Registration flows

1. Reference no – reference number will let the person-in-charges (PIC) to refer the data easily
2. First name – user need to input their first name
3. IC/passport – user need to input whether IC number or passport number
4. Address – user need to input the address of the user
5. Postcode – user need to input the postcode where they live
6. Telephone no – user need to input number telephone that can be contact easily by our PIC
7. Date register – the date that user have register the form
8. Total traveller – user will choose how many person will go for travel
9. Budget price – user need to choose how many budget did they have
10. Various of buttons option :-
  - a) Add record – button to add user data
  - b) Reset – to reset user input
  - c) Print – print the user table data
  - d) Delete – to delete the data that user had input in the table
  - e) Exit – to exit from this current page
  - f) Inquiries – will let user to go to inquiries page

#### 4. Inquiries page

##### 4.1 Information

1. Test panel – user can input any comments or inquiries in this box
2. Send button – the data that user had input will save to programmer file which is on .txt file
3. Home travel button – will let the user to go to the main page of our Jom Kasi Travel System page

Name	Date modified	Type	Size
file - Notepad			

The screenshot shows a Windows File Explorer window. The left pane lists several folders: Custom, download, MoiveM, NetBean, Wonders, Zoom, and file. The right pane shows a file named "file - Notepad" with a ".txt" extension. The contents of the file are: "File Edit Format View Help" and "i need to know more about this continents please.".

4.

The comments or questions that user input will directly send to the programmer document which is in .txt file.

#### 5.4 Inquiry

## REPORT (EVENT COODINATOR)

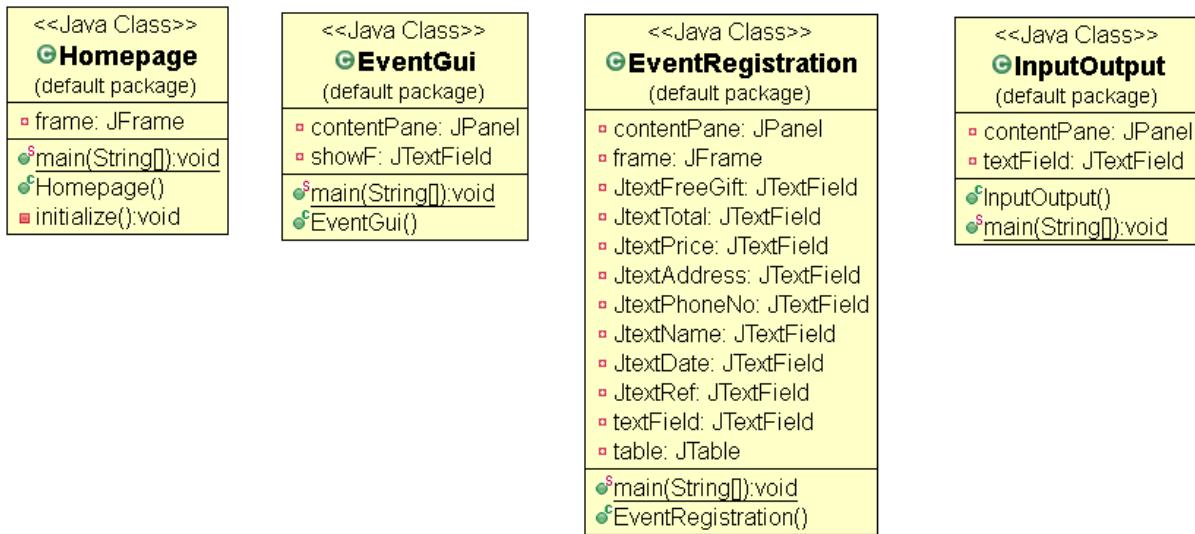

### 1. PROJECT BACKGROUND

Event Coordinators, also known as Event Specialists or Event Planners, are responsible for every aspect of event planning. Their main duties include selecting venues, determining the cost, arranging event services and monitoring client approval. They may work for an events company or as a contractor.

- Identify the client's requirements and expectations for each event.
- Liaise with vendors, exhibitors, and stakeholders during the event planning process to ensure everything is in order.
- Manage all event set-up, tear down and follow-up processes.
- Maintain event budgets.
- Book venues, entertainers, photographers, and schedule speakers.
- Conduct final inspections on the day of the event to ensure everything adheres to the client's standards.
- Assess an event's overall success and submit findings.

To make easier for every clients, clients can use all the features inside the program and a quick guide to show how to use it.

## 2. UML Class Diagram

## 3. Program Description

This is the user manual of the program, to make it easier for our client. Here's show that our programs is very productive to use.

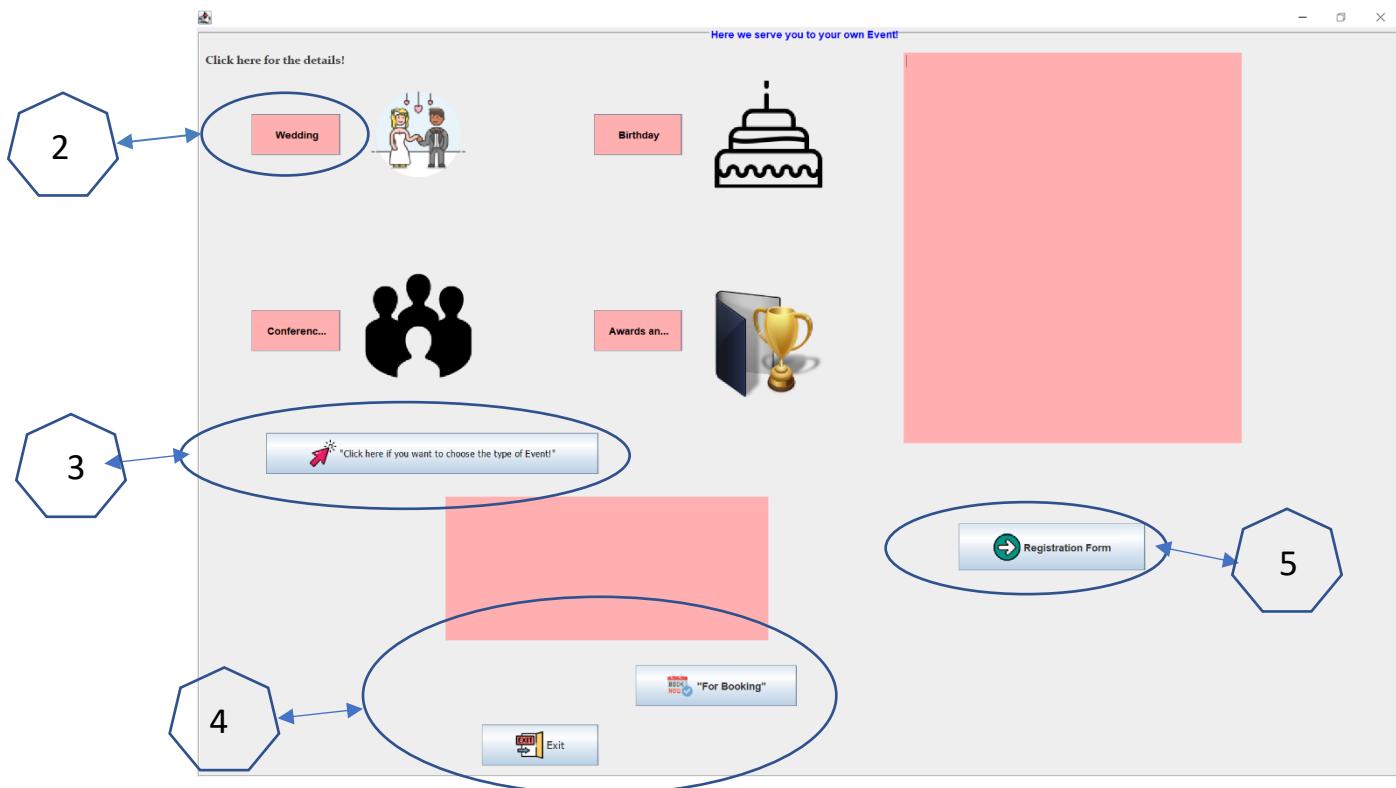

Information button:

1. Press here button: By clicking the button, client can go to the futher information.
2. Type of event button: If you want to know the details about the event.
3. Click here button: If you want to choose the event. You just clik the button.
4. Exit and booking button: For the client cancelation and for futher info.
5. Register button: By clicking the button, you can register using the form.
6. Text Area Panel: This part is where user can see the detail information of the event.
7. Message pop up: If event are not available. It will notify user a friendly message that the event is currently unavailable.

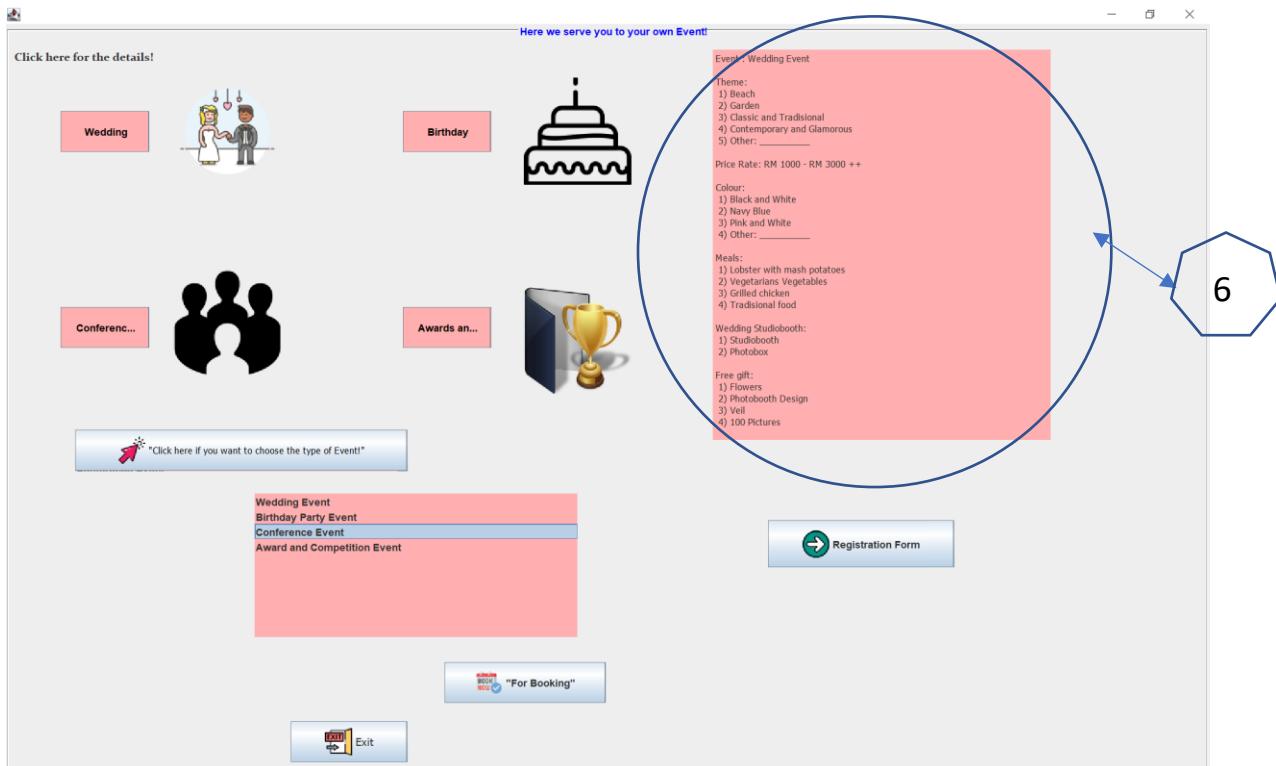

8. Various button option
  - a. Add record: will add the input user key-in and choose.
  - b. Reset: reset the user input.
  - c. Delete: delete the data that user input after added in the table.
  - d. Print: to print the table data.
  - e. Exit: to go to the main interface.
  - f. Next: for any inquiries
9. Inquiries: If you have any comment, any suggestions you just put all of your ideas inside the box.

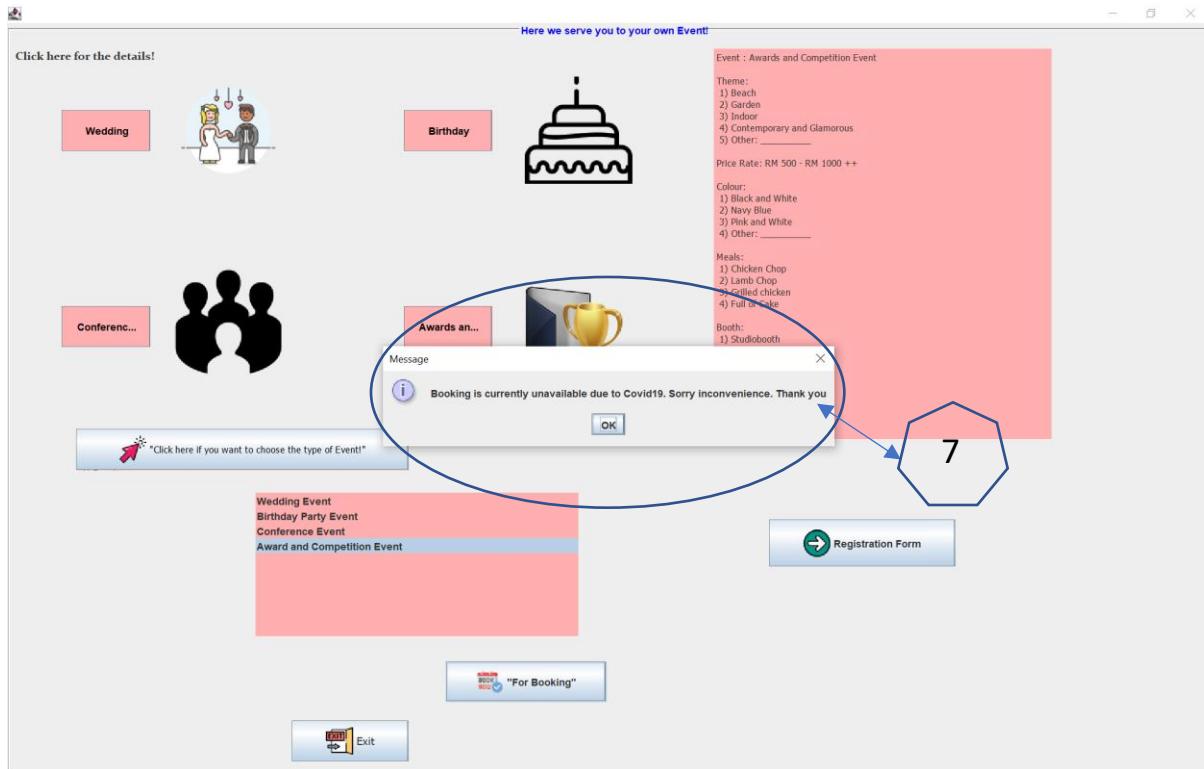

1.1 Welcoming page of our program. Just press the pink button to go to the others feature.

1.2 The features will show up the program catalog. So our client can choose the event.

1.3 Just press the button either you want wedding or others and the details will pop up.

1.3 Due to the pandemic, any event could not be held.

The screenshot shows a "Customer Registration System" window. On the left, there's a form with fields for Ref No, Date, Name, Address, Phone No, Gender (a dropdown menu), Type Of Event (a dropdown menu), Price (RM) (a text input field), Total (a text input field), and Free Gift (a text input field). On the right, there's a table with columns: Ref No, Date, Name, Address, Phone No, Gender, Type Of Event, Price (RM), Total, and Free Gift. Below the form and table is a row of buttons: Add Record, Reset, Delete, Print, Exit, and Next. A large blue oval surrounds the entire form area, and a blue octagon with the number 8 is located in the bottom right corner.

1.4 If our client confirm to make a booking, just press the button “Register”. So the features will pop up.

# Customer Registration System

Ref No	123
Date	12/01/2021
Name	SITI NURULNADIRAH BINTI AZHAR
Address	ERA MEWAH, SUNGAI BULOH
Phone No	019-3470466
Gender	Female
Type Of Event	Wedding
Price (RM)	12,000
Total	13,000
Free Gift	PHOTO BOOTH

Ref No	Date	Name	Address	Phone No	Gender	Type Of Event	Price (RM)	Total	Free Gift

Add Record

Reset

Delete

Print

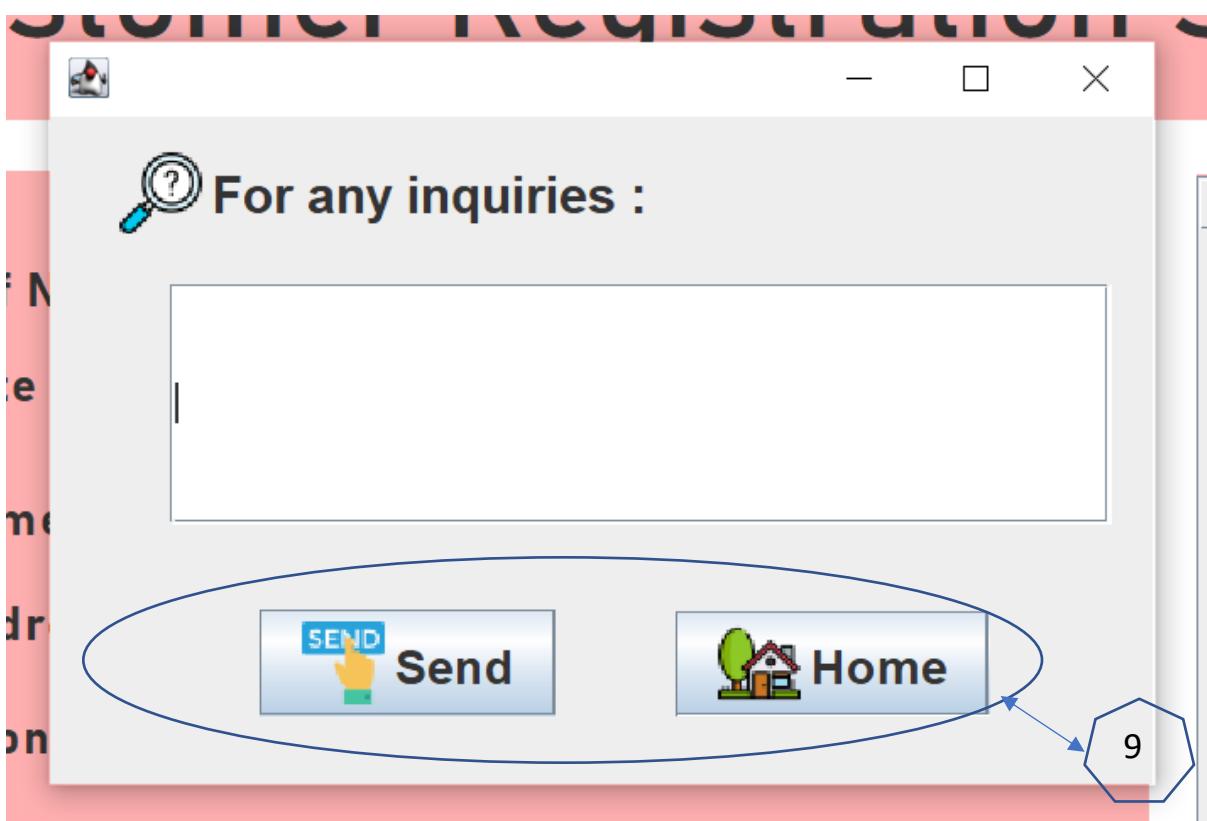

Exit

Next

1.5 Fill in the blanks and press the “Add Record” button. Press the button “Next” for any inquiries.

1.6 So here's the last features in our program. For any inquiries or any comment just sent here. Then you can press the button "Home" to go to the whole program.
